GigE Vision camera with the Sony IMX540 CMOS sensor

Manta G-2460 is a 24.6 megapixel machine vision camera with a GigE compliant Gigabit Ethernet port and Hirose I/O port. Manta G-2460 incorporates the high quality Type 1.2 (19.3 mm diagonal) Sony fourth generation IMX540 back-illuminated CMOS sensor with Pregius S global shutter technology. At full resolution, this camera runs 4.9 frames per second. With a smaller region of interest, higher frame rates are possible.

Providing the largest choice of sensors and an advanced feature set, Manta is Allied Vision's most versatile GigE Vision camera series. Numerous modular options, including angled head and board level versions facilitate the camera integration in almost any application. Manta's advanced feature set simplifies multi-camera applications, reduces the need for cabling, and keeps your costs low. By default monochrome models ship with B 270 protection glass and color models ship with a Type Hoya C-5000 IR cut filter.
