OPTO ENGINEERING

Hypercentric Lens For Bottom and Side Inspection for 1/3" sensors, sample diameters down to 2 mm

KEY ADVANTAGES

Perfect focusing of hollow objects with just one camera
For precise and high-resolution simultaneous imaging of the inner walls and bottom of cavities

Cavity inspection from the outside
No need to put an optical probe into the hole

Very high field depth and flexibility
Cavities featuring different shapes and dimensions can be easily imaged by the same lens

Wide viewing angle and manual focus adjustment

Ideal for the **inspection of small holes**, down to 0.75 mm

REACH DOSSIER

INTERNATIONAL PATENT PENDING

HC series features hypercentric lenses for sensors up to 1.1" designed for the simultaneous inspection of the inner sides and bottom surfaces of hollow cylindrical samples, such as bottles, cans, vials, threaded holes and tubes.
